VENKATA GOPI PERUMALLA

DevOps & Site Reliability Engineer | AWS & Kubernetes | 4+ Years Experience
Dublin, Ireland | +353 899460440 | gopiperumalla14@gmail.com | LinkedIn | GitHub | Portfolio
Stamp 1G – full right to work in Ireland

PROFESSIONAL SUMMARY

DevOps Engineer with 4+ years of experience working with AWS, Kubernetes, Terraform and CI/CD pipelines. Experienced in managing production Amazon EKS environments, automating AWS infrastructure and troubleshooting application deployments. Strong background in production support, monitoring with Prometheus and Grafana, and scripting in Python and Bash. AWS Certified Solutions Architect – Associate, with an MBA in Project Management from Dublin Business School.

TECHNICAL SKILLS

- **Cloud (AWS):** EC2, EKS, ECS, ECR, Lambda, S3, EBS, EFS, RDS, IAM, Elastic Load Balancing, Auto Scaling, CloudFront, SNS, CloudWatch, CloudTrail, Secrets Manager
- **Cloud Networking:** VPC, subnets, security groups, load balancers, AWS Direct Connect, Kubernetes network policies, TLS
- **Containers & Orchestration:** Docker, Kubernetes, Amazon EKS, Helm, kubectl, YAML manifests, cluster and control plane upgrades, node patching
- **Infrastructure as Code:** Terraform (reusable modules, remote state), AWS CloudFormation, Ansible
- **CI/CD & GitOps:** Jenkins (Pipeline, Multibranch, Groovy), GitHub Actions, Argo CD, Git, GitHub, Maven, SonarQube, JFrog Artifactory, branching strategies
- **Monitoring & Observability:** Prometheus, Grafana, Loki, Amazon CloudWatch, ELK Stack, SLOs, alerting rules and dashboards
- **Security & Access Control:** IAM roles and policies, Kubernetes RBAC, network policies, TLS, Jenkins security, image and secret scanning (Trivy, Gitleaks)
- **Scripting & Automation:** Python, Bash/Shell, AWS Lambda
- **Operating Systems & Servers:** Linux (Ubuntu), Windows, Nginx, Apache Tomcat, IBM WebSphere
- **Production Support:** Incident response, troubleshooting, root-cause analysis, disaster recovery and rollback planning, Agile, Jira

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer

Cognizant Technology Solutions | Hyderabad, India | Jun 2023 – Aug 2024

- Operated production Amazon EKS clusters, carrying out Kubernetes version upgrades and node patching with minimal disruption to running services.
- Secured cluster and cloud access with Kubernetes RBAC, network policies, IAM roles and TLS.
- Created and updated Helm charts to deploy applications to EKS across different environments.
- Used Prometheus, Grafana and CloudWatch to monitor EKS workloads, investigate alerts and troubleshoot production incidents.
- Led root-cause analysis after production incidents.
- Maintained and updated Terraform code for AWS and EKS infrastructure.
- Used Ansible playbooks for server configuration and Python scripts for routine platform tasks.

Senior Software Engineer – DevOps

Sevya IT Pvt Ltd | Hyderabad, India | Sep 2022 – Jun 2023

- Built Jenkins Pipeline and Multibranch jobs in Groovy to run Maven builds, SonarQube checks, Docker image builds and Kubernetes deployments on AWS.
- Administered Jenkins on Linux, managing plugins, credentials and security for development teams.
- Created reusable Terraform modules to provision EKS clusters, VPCs, subnets, security groups and Auto Scaling groups, using remote state.
- Provisioned IAM roles, S3 policies and RDS snapshots with AWS CloudFormation, and integrated S3 and IAM with EKS clusters.
- Set up the Git branching and tagging strategy with developers and resolved merge conflicts before releases.

Software Engineer

Capgemini | Hyderabad, India | Mar 2020 – Sep 2022

- Built and maintained Jenkins CI/CD pipelines for deployments to Apache Tomcat and IBM WebSphere, publishing versioned build artefacts to JFrog Artifactory.
- Configured distributed Jenkins build agents to support parallel builds for multiple development teams.
- Automated EC2 start/stop operations using AWS Lambda and SNS to reduce idle compute usage, and wrote Bash scripts for routine Linux server tasks.
- Supported production releases, investigated failed Jenkins builds and participated in major-incident calls to troubleshoot deployment issues.
- Worked with development teams in Agile sprints, tracking releases and operational tasks in Jira.

PROJECT

Microservices Platform on AWS EKS with GitOps

Oct 2026 | GitHub

Tech: AWS EKS, ECR, Terraform, GitHub Actions, Gitleaks, Trivy, Docker, Helm, Argo CD, External Secrets, AWS Secrets Manager, Prometheus, Grafana, Loki

- Built a VPC across two availability zones with private subnets for the nodes, an EKS cluster on Spot nodes and ECR registries, using reusable Terraform modules with S3 remote state.
- Built a GitHub Actions pipeline with unit tests, Gitleaks and Trivy. Trivy blocked a release over 3 HIGH CVEs, fixed by upgrading the dependencies rather than weakening the scan.
- Deployed three microservices with Helm and Argo CD (auto-sync, prune and self-heal), with database secrets pulled from AWS Secrets Manager through External Secrets and EKS Pod Identity.
- Set a 99.5% SLO with a multi-window burn-rate alert. Introduced a controlled configuration failure causing about 25% errors, traced it with Grafana, Loki and Argo CD, rolled back with Git in about two minutes and wrote the RCA.
- Ran the platform under load (6,200+ orders processed), kept the cost to a few dollars with Spot nodes and a single NAT gateway, and tore down all 70 resources with Terraform the same day.

ADDITIONAL EXPERIENCE

Sales Assistant

Lenehan's Hardware | Capel Street, Dublin | Apr 2025 – Present

- Help customers diagnose problems and find the right solution across a 16,000+ product range, while handling sales, deliveries and stock control in a busy city-centre store.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate, Amazon Web Services | Credly

EDUCATION

MBA in Project Management (NFQ Level 9)

Dublin Business School | Dublin, Ireland | 2024 – 2025

Bachelor of Engineering in Civil Engineering

Jawaharlal Nehru Technological University | Kakinada, India | 2020
